

NSK Rope Access Solutions

Nordisk Svejse kontrol A/S

SAFETY

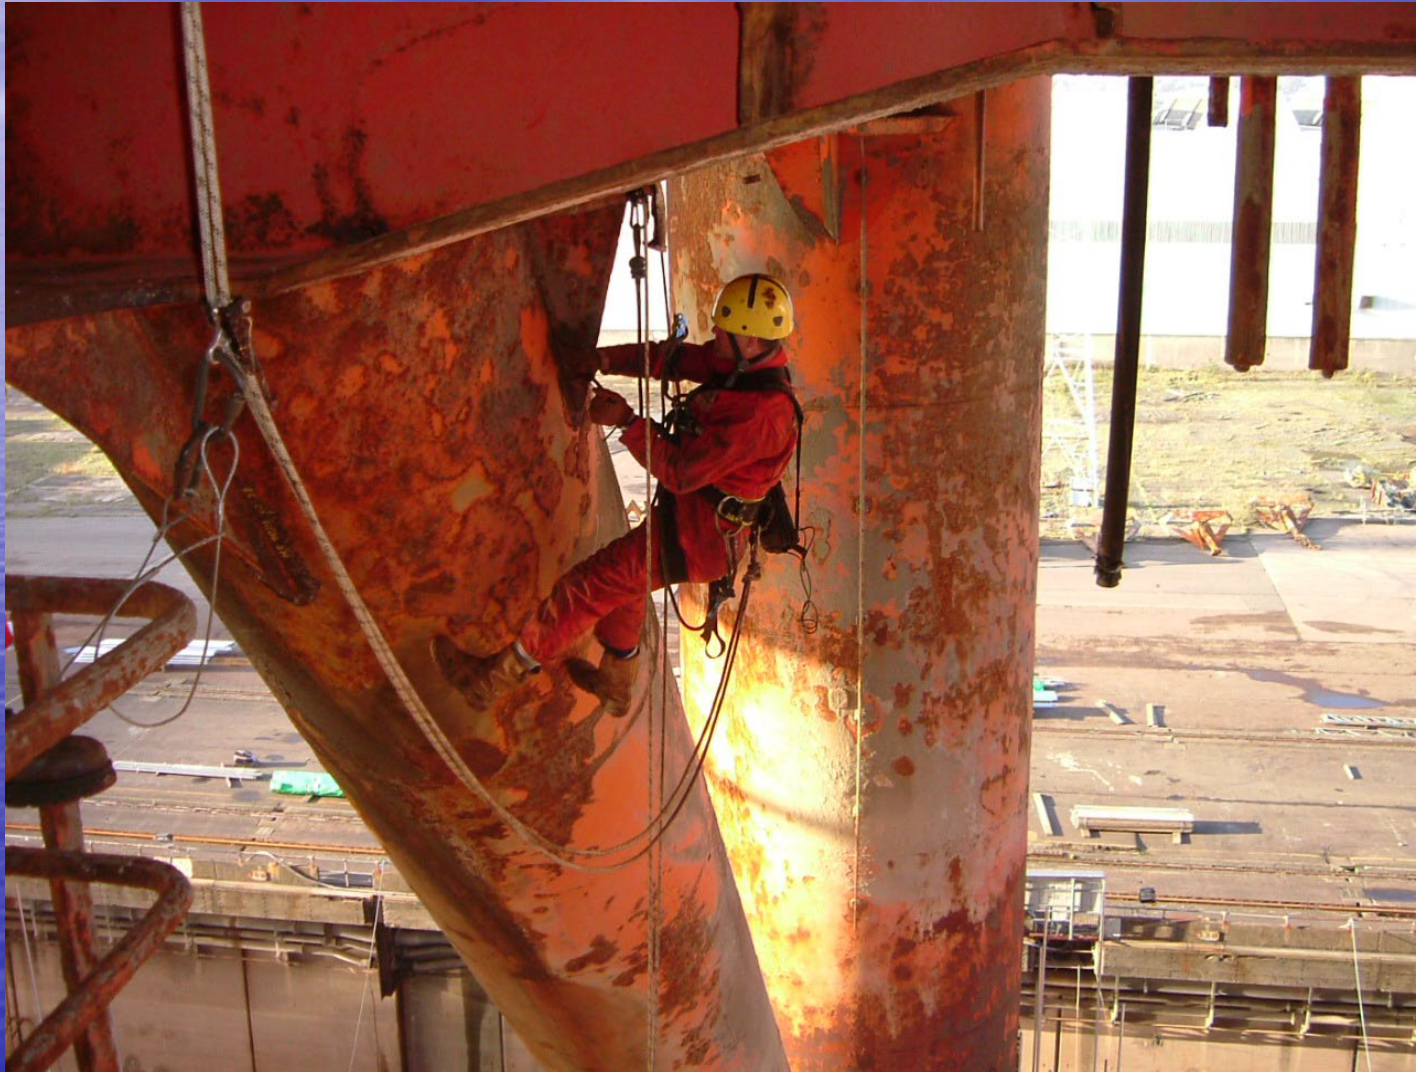

- **Rope Access has been the safest way to work at height, due to the combined effect of high standard and training, quality equipment and the reduced number of personnel involved in completing a task and therefore exposed to risks. Job specific assessments along the guidelines of IRATA make Rope Access the choice for difficult location access.**

Benefits

- Considerable cosy savings
- Fast and Efficient
- Quiet and Discreet
- Minimal disruption
- Equipment moved @ end of each job
